SP-337

First printing, February 2020

Discussion is welcomed for all materials published in this issue and will appear ten months from this journal's date if the discussion is received within four months of the paper's print publication. Discussion of material received after specified dates will be considered individually for publication or private response. ACI Standards published in ACI Journals for public comment have discussion due dates printed with the Standard.

The Institute is not responsible for the statements or opinions expressed in its publications. Institute publications are not able to, nor intended to, supplant individual training, responsibility, or judgment of the user, or the supplier, of the information presented.

The papers in this volume have been reviewed under Institute publication procedures by individuals expert in the subject areas of the papers.

PREFACE

Offshore and marine concrete structures have not received enough attention in the recent past, at least in the United States. The complexity and safety concerns associated with these structures are such that they probably need more attention compared to many other types of concrete structures. Also, offshore and marine concrete structures are so global in nature that there is a higher need for better coordination and synchronization of design, construction, inspection, and maintenance practices in different parts of the world.

A two-part session, titled “Offshore and Marine Concrete Structures: Past, Present, and Future,” was held at the Spring 2019 ACI Concrete Convention and Exposition on March 24-28 in Quebec City, Quebec, Canada. The session, sponsored by ACI Committee 357, Offshore and Marine Concrete Structures, highlighted accomplishments of the past, current state-of-the-practice, and a path for the future. This ACI Special Publication (SP) is a compilation of select papers presented at the session. The efforts of all the reviewers in assuring the quality of this publication is greatly acknowledged.

Mohammad S. Khan, Ph.D. P.E.
Editor

TABLE OF CONTENTS

SP-337-1:

Design and Construction Overview of Offshore Concrete Gravity-Based-Structures:
Past, Present, and Future1-20
Authors: Widiyanto, Jameel Khalifa, Erik Åldstedt, Kåre O. Hæreid, Kjell Tore Fosså

SP-337-2:

Hebron Offshore Concrete Gravity-Based-Structure: Novel Design and
Construction Techniques 21-39
Authors: Widiyanto, Jameel Khalifa, Kåre O. Hæreid, Kjell Tore Fosså, Anton Gjørven

SP-337-3:

Barbours Cut Terminal - Container Port Wharf Expansion Design..... 40-57
Authors: Jeremiah D. Fasl and Carl J. Larosche

SP-337-4:

Testing and Inspection Techniques for Offshore and Marine Structures..... 58-77
Author: Mohammad S. Khan

SP-337-5:

Concrete Mix Design Development for Offshore Structures 78-88
Authors: Kjell Tore Fosså, Widiyanto

SP-337-6:

Performance of Concrete in a Harsh Marine Environment for 25 Years..... 89-100
Authors: Edward (Ted) Moffatt, Michael Thomas and Andrew Fahim

SP-337-7:

Importance of Structural Assessment before Rehabilitation Case Study:
Waterfront Concrete Pier..... 101-116
Authors: Pericles C. Stivaros, Varoujan Hagopian, and Alan D. Pepin

SP-337-8:

LaGuardia Airport Design Build for Extending Runway Decks for
Safety Area Improvements, Queens, NY 117-135
Authors: Anthony Devito, Alex Krutovskiy and Leszek Czajkowski
